## Education

**San Diego State University**  
Bachelor of Science,  
Computer Science

## Technical Skills

### LANGUAGES

C#/ Java  
JavaScript/ HTML/ CSS  
Python

### FRAMEWORKS/ LIBRARIES

Selenium: Python/C#  
.NET: C#  
Express/Node: JavaScript  
React: JavaScript  
Bootstrap: CSS/JavaScript  
Pandas: Python

### TOOLS/ SOFTWARE

TFS / Visual Studio  
Git / GitHub  
Jenkins CI/ CD  
AWS Platform  
VMWare

### DATABASE

SQL / MySQL  
MongoDB

### OTHER SKILLS

Bilingual (English & Spanish)

## Work Experience

**RiverStone Investors** *Jacksonville, FL* (Oct. 2019 - Current)  
Lead Software Developer

- Architected framework to pull and map millions of data points from a growing catalog of sources using python pandas and MapReduce along with AWS MySQL
- Designed and implemented a rich, single-page web app to provide secure and up-to-date reports which directly contributed to over \$750,000 gross sales in 2020
- Created RESTful API endpoints and access pages to allow licensing for database queries and reports
- Managed team of four developers. Assigned tasks, ensured understanding of requirements, oversaw code committed, and verified acceptance testing of various components and end-to-end functionality

**Mitchell International** *San Diego, CA* (July 2017 - Nov. 2019)  
Software Development Engineer I Auto Physical Damage

- Developed library of 600 automated test cases to cover several web and desktop applications used by over 30,000 industry professionals and 300 leading auto insurance providers
- Built custom test framework from conception to implementation using Selenium WebDriver, SQL, MS Test, VS Coded UI, C#/ .NET to streamline web API and UI testing and database verification
- Trained over 10 development and QA teams to execute automated test suites and to contribute to existing suite of test cases using custom framework
- Oversaw code committed by offshore team, led in-depth code reviews with focus on best practices, and routinely conducted after-hours, status calls to coordinate with offshore and onshore team
- Developed and maintained automated Jenkins pipelines for code deployment and system test execution
